Education

❖ 2006-2010： Software Engineering, Fudan University
    ✓ **Position:** Monitor & Vice-chairperson of Student Union
    ✓ **Awards:** Second-Class Scholarship & Excellent Student
    ✓ **Achievements:** Build up a solid basement on Computer Science

Work Experience

❖ 2009-2010： Software Engineer - IBM
    ✦ Project: *IBM Mashup Center 2.0*
        ✓ **Introduction:** A typical Mashup-Tech based product, composed by two parts: Data Source Management Subsystem and Front-End Building Subsystem(with data source)
        ✓ **Responsibility:** Developing the Front-End Building Subsystem(like a heavy-weight website building system) with JavaScript, CSS and HTML
        ✓ **Achievements:** 1. First try on the rich client application development
        2. Learned Front-End techs and Dojo framework
        3. Attracted by JavaScript

❖ 2010-2011： Front-End Engineer - Taobao
    ✦ Project: *Cloud Service System* & *Intelligent Service Robot System*

- ✓ **Introduction:** A typical IM(Instant Message) and Single Page Application: provide real-time online customer support
- ✓ **Responsibility:** Responsible for designing and implementing the front-end part of system:
  1. Modularized the application
  2. Implemented a Pub/Sub System to enable the communication between modules and make them loosely coupled
  3. Implemented cross-domain messaging with HTML5 features
- ✓ **Achievements:** 1. Initially understanding with Front-End MVC

  2. Got familiar with Long Live Connection and Polling techs

- ✦ Translated the book: *HTML5: up and running*
  - ✓ **Introduction:** Encouraged by XiaoMa(Leader of F2E Team in Taobao), I translated this book into Chinese, which is my first time to do such formal translating work
  - ✓ **Achievements:** 1. Technical translating is a rigorous physical and mental work

    2. Forced myself to dive into every tech details in book

    3. Feel really excited to see my name on the book

- ✦ Found *Trans4Fun*
  - ✓ **Introduction:** I found this organization for two reasons: one is there are many people like me who have interests in technical translating and the other is the lack of Chinese resources on Front-End Technology

✓ **Achievements:** 1. Published several popular works

2. Fixed numbers of team members

3. Focus on project based translating

❖ 2011-2012： Front-End Engineer - Taobao
- ✦ Translated *JavaScript: The Definitive Guide*
  - ✓ **Introduction:** Do the translating work on this book with famous engineers such as YuBo, XiaoMa, SanQi, YiZhou and BaChi. And I learned how to make better cooperation with each other during the process
  - ✓ **Achievements:** Improved my translating skill

- ✦ Translated *The Node Beginner Book*
  - ✓ **Introduction:** My first time to do all the preparing and translating works such as contacting the author to get the translating rights, setting up the team, translating the book and so on. Fortunately, our translated book was loved by lots of Node.js Learners
  - ✓ **Achievements:** Improved my communication skill with foreigners and organization skill with online teamwork

- ✦ Organized the sixth *D2 Technology Forum*
  - ✓ **Introduction:** As a project manager, I was in charge of organizing this thousands of scale technology forum which is also one of the most famous technology forum focusing on Front-End Technology
  - ✓ **Achievements:** 1. First time to be the project manager

2. Improved my communication skill with different roles

3. Realized the importance of Plan B

4. Titled *Excellent Project Manager* by the committee
